## SKILLS

---

- **Design Build Project Expertise:** Managing all stages of construction projects, from planning and design.
- **On-Site Construction Supervision:** Overseeing construction activities, 100% compliance with specifications.
- **Project Management Liaison:** Proficient in acting as the primary point of contact between stakeholders.
- **Environmental Management:** Implementing environmental sustainability practices, ensuring compliance.
- **Cost Control & Reporting Software:** Heavy Job (equivalent) and cost control software for tracking expenses.

## WORK EXPERIENCE

---

### Machine Operator

October 2024 – Present

*Dainty Foods*

*Ontario*

- Conducted routine safety inspections and implemented preventative maintenance procedures on production machinery, achieving a 25% reduction in equipment-related incidents and improving operational reliability.
- Operated, monitored, and adjusted automated machinery, ensuring compliance with safety standards, reducing downtime by 15%, and enhancing overall equipment efficiency by 20% in line with operational safety protocols.
- Collaborated with cross-functional teams to analyze machinery performance data, identifying inefficiencies and contributing to a 30% reduction in machine breakdowns by initiating targeted troubleshooting procedures.
- Monitored product quality during production runs, conducting inspections and reporting findings to senior engineers, achieving 98% compliance with quality standards, and ensuring optimal performance of production.
- Led training sessions on equipment usage and safety procedures, enhancing team competencies and reducing training time by 10%, while improving team performance and ensuring adherence to operational requirements.

### Quality Inspector

February 2023 – June 2024

*AGS Automotive Systems*

*Ontario*

- Led a team of 20+ operators, overseeing compliance with stringent technical specifications and safety protocols, reducing production errors by 18% and ensuring smooth, efficient workflow across the production environment.
- Conducted daily inspections of automotive components, maintaining logs to identify deviations from quality standards, resulting in a 30% improvement in defect detection and reducing rework and production delays.
- Implemented corrective actions in real-time based on quality assessments, reducing waste by 12%, and enhancing throughput by 20% by aligning processes with production specifications and reducing the rate of non-compliance.
- Mentored team members in best practices, fostering a culture of accountability, and driving continuous improvement efforts, which resulted in a 25% increase in team productivity and adherence to quality control measures.
- Generated comprehensive reports on quality control processes, leveraging analytical tools to present data-driven insights to senior management, improving decision-making and reducing process variation by 15% over the course.

### Site Supervisor

July 2021 – September 2022

*Jeyem Associates*

*India*

- Supervised civil and utility infrastructure work, ensuring timely project completion and 5% adherence to budget targets, coordinating daily progress and maintaining rigorous standards for quality assurance and site safety.
- Directed and managed subcontractors, labor, and material flow, ensured meeting of schedules without compromising project integrity, resulting in a 98% on-time delivery, enhanced coordination for seamless workflow.
- Controlled cost tracking for daily operations, utilizing advanced project management software and Excel to monitor labor and material expenditure, driving a 12% reduction in cost overruns through resource optimization.
- Conducted Health, Safety, and Environmental (HSE) inspections, identifying potential hazards and addressing compliance issues, ensuring zero work-related incidents for the entire duration, and upholding 100% safety.
- Collaborated with project managers to adjust project timelines and optimize resource allocation, resulting in a 15% improvement in efficiency and communication flow, ensuring effective decision-making and issue resolution.

## EDUCATION

---

### Master of Engineering in Civil Engineering

September 2022 – December 2023

*University of Windsor, Ontario*

### Bachelor of Technology (B Tech)

August 2017 – May 2021

*SCMS Engineering College & Technology, India*

## CERTIFICATIONS
